

# RECYCLABLE VS REUSABLE TOTES

## RECYCLABLE TOTES

### Description

- Flexible, durable, sustainable
- Contents:
  - Inner liner for liquids
  - Tamper evident shrink seal
  - Outer layer made of corrugated paper

### Materials

- 7 lbs of plastic
- Puncture-resistant corrugated paper for the outer layer

### Storage & Handling

- Can dispose of immediately
- Quick and easy disposal
- 90% recyclable

## REUSABLE TOTES

- Rigid, durable, multiple uses
- Returned to our facility after use for sanitation and preparation for the next order
- Contents:
  - Plastic container
  - Steel outer cage for protection

- 40 lbs of plastic
- Steel metal for the outer layer

- Requires storage after use
- Must be sent back to Catania Oils for cleaning and redistribution

# RECYCLABLE VS REUSABLE TOTES

## RECYCLABLE TOTES

### Food Safety

- Tamper evident, anti-corrosion shrink seal
- Food safety and HACCP-compliant
- Inner-liner prevents oxidation

### Sustainability

- More than 90% easy-to-recycle materials
- Waste-to-energy efficient liner
- No return shipping or cleaning
- Certified sourcing of paper through the *Sustainable Forestry Initiative*

## REUSABLE TOTES

- HACCP compliant
- Tamper evident, anti-corrosion, seal
- Closure system with latching hooks, inner liner ring
- Oxidation begins after first use

- Difficult to recycle
- Finite life cycle
- Must be returned for cleaning, labor-, chemical-, and water-intensive sanitation process
